

RISK ASSESSMENT (SITE)

Activity: Various Events and Coaching

Site: Stanton Lakes

Emergency Equipment: First aid kit and group shelter are located in the kit container. Emergency phone located in Stanton Lakes restaurant.

Site Description: An angling lake with a restaurant on-site that is used by the club. The home of HCC and therefore the site has storage containers for the majority of the clubs equipment. Launching is done by the containers with dedicated decking and a seal launch point.

IMPORTANT: The below has been collated as an exercise before the event. This does NOT replace the need for ALL coaches and leaders to perform an ongoing dynamic risk assessment throughout the event. It is assumed that for all risks, ongoing dynamic risk assessments will be conducted.

At the far side of the lake there are high banks, but generally land access is easy around the whole lake.

Anglers are usually positioned on the lake opposite the restaurant.

Valid: 2020
(summer months)
